

Home Access Center Parent Gateway to Student Information

Home Access Center (formerly Parent Connect) contains a wealth of information about your student. Schedules, assignments, grades, transcripts, discipline records, tardies and absences, emergency contact information, etc. can be found on HAC.

From the "Registration" page, you can update phone and email addresses and FERPA preferences. These changes will be directly updated into eSchoolPLUS—the school's database.

You can also establish settings so HAC sends alerts via email if your student fails an assignment or is tardy or absent.

To ensure access this information:

- If your child was in a Fulton County School in the past, you should be in the HAC system, and your login and password remain the same.
- If you are new to CHS (or you've forgotten your login or password), you can pick up a login and password at the front desk whenever the school is open. ***You must do this in person as you need to show a photo ID to receive this information.***
- Siblings within the Fulton County School System can be linked within one HAC account. Ask CHS to link your CHS student to his/her siblings when you set up your HAC account.

Please note that tabs within HAC are not always active. For example, "Classwork" is not live at the beginning of each semester, until a few assignments are logged. The alert system is not typically active until mid-September, so parents should especially be proactive about checking tardies/absences at that time.
